Re: TST Quarterly Game Payout Calculation

Technical Systems Testing (TST) is an internationally-recognised Accredited Testing Facility (ATF) offering a full range of testing and consultation services for terrestrial (traditional / land-based) and interactive gaming, wagering, lottery, e-commerce and Information Technology (IT) industries.

This Certification Letter pertains to TST's **Game Payout Calculation** for the live game play log files as supplied by to TST, from the E-Tainment's Internet Gaming System (IGS), for the period of 01 November 2008 to 30 November 2008.

TST's **Game Payout Calculation** of the average payout percentages (i.e.: the percentage of wagers that are paid back to the players in the form of winnings) have resulted in the following values for the live game play log files submitted:

Game Name	Calculated Payout Percentage
All Games Combined	98.63%

TST's **Game Payout Calculation** was limited to analysis in the laboratory environment, and was based solely on the live game play log files submitted on 10 December 2008. For verification purposes, TST has maintained a control version of these live game play log files. The scope of work for TST's **Game Payout Calculations** did not include a technical assessment of the E-Tainment's Internet Gaming System (IGS) or its associated Information Systems (IS) and financial controls.

TST certifies that the payout percentages listed above have been correctly calculated based on the amounts wagered and won in the live game play log files submitted for the period of 01 November 2008 to 30 November 2008.

Yours sincerely,

A handwritten signature in black ink that reads "Noah Turner".

Mr. Noah Turner
Chief Technical Officer (CTO)
TECHNICAL SYSTEMS TESTING (TST)
